

DOCUMENT OUTLINE

By shauraya salwan

Please refer to the following information:

FONTS: Use Northface for headers/subheaders and Courier New Italics for paragraphs.

AGE-RESTRICTED WEBSITE: The user's age will determine whether they can access the website. To input their age, the user must select their country from a dropdown list. The chosen country will determine the legal age for that location. The user will then enter their birthdate (MM/DD/YYYY) in input fields. JavaScript will process the submitted age, and if the user is of legal age, they will be directed to index.html. If they are underage, they will be directed to an index page without access to the Store page, but they will still have access to the Merch page. The Submit button will be located under the input fields.

LOGO: The logo will remain the same size (300px x 300px) and centered regardless of device. We didn't use a grid, but instead used CSS styling.

COUNTRY DROPDOWN: The dropdown list will contain all the countries, and the user will choose their country to determine the legal age for that location.

INDEX: The logo will always start at column 1, while the navigation will always end at column 12. On mobile, the navigation will be a hamburger dropdown menu, and on desktop, it will be a classic navigation.

HERO IMAGE: The hero image will be a large promotional poster that spans the entire width of the page and will not shrink in size from mobile to desktop. The focal point of the promotional image will be in the center, so the image will still have the same effect even if the outer wings are not visible on mobile.
